Dinesh Kumar Gummadavelli

Data Scientist | AI/ML Engineer | Data Engineering @ TCS | M.S.
Data Science, UCO
United States

Summary

I'm a Data Scientist and ML practitioner with a strong foundation in data engineering, built over 2+ years at TCS working with AWS Redshift, GCP BigQuery, and PySpark. I'm currently completing my M.S. in Data Science at the University of Central Oklahoma (GPA 3.83), with published research in LLM systems and hands-on experience across machine learning, computer vision, and predictive analytics. I enjoy solving real problems with data — whether that's building cloud ETL pipelines, designing ML models, or extracting insights that drive business decisions. Open to Data Science, Data Engineering, and AI Engineering opportunities.

Experience

University of Central Oklahoma

1 year 5 months

Graduate Research Assistant

August 2025 - May 2026 (10 months)

Edmond, OK

- Co-authored a research paper accepted at EAI MobiCASE 2026, focusing on LLM debugging performance.
- Conducted statistical analysis across five context types to identify key factors influencing debugging accuracy.
- Presented findings at Oklahoma Research Day, showcasing the importance of problem description in code debugging.
- Developed strong analytical and presentation skills while collaborating with faculty and peers at the University of Central Oklahoma.

Teaching Assistant

January 2025 - January 2026 (1 year 1 month)

- Supported students in designing and implementing complex data structures and algorithms.
- Assisted the professor in grading assignments and reviewing projects to ensure academic integrity.

- Fostered a collaborative learning environment that encouraged student engagement and understanding.

American Fidelity

Data Analyst Intern

May 2025 - August 2025 (4 months)

- Developed and deployed Power BI dashboards to highlight key business KPIs, enhancing data visibility.
- Migrated over 10 legacy Qlik dashboards to Power BI, streamlining reporting processes.
- Created a Python script for daily extraction of insights from sales AI chatbot logs, aiding automation improvements.

Tata Consultancy Services

2 years 4 months

Data Engineer

April 2022 - January 2024 (1 year 10 months)

- Migrated over 100TB of data from on-premises Oracle to GCP BigQuery, enhancing data accessibility.
- Developed PySpark transformation pipelines to convert raw logs into Parquet files, reducing query latency by 25%.
- Maintained incremental and batch ETL pipelines, ensuring data quality and adherence to SLAs.

Assistant System Engineer

October 2021 - March 2022 (6 months)

Hyderabad

In my role at Tata Consultancy Services, I was instrumental in migrating data to Amazon Redshift, which streamlined our analytics processes. I ingested over 100TB of competitor and Google Ads campaign data, ensuring that downstream teams had access to analytics-ready tables. This project significantly improved our data handling capabilities and supported informed decision-making across the organization.

National Small Industries Corp (Nsic)

Intern

June 2019 - July 2019 (2 months)

Hyderabad, Telangana, India

Education

University of Central Oklahoma

Master's degree, Data Science · (January 2024 - May 2026)

SRM University

Bachelor of Technology - BTech, Electronics and Communications
Engineering · (2017 - May 2021)

Sri Chaitanya College of Education

Mathematics, Physics and Chemistry · (June 2015 - April 2017)
